Zinc (Zn) Actual.....	0.1%
0.1% Chelated Zinc (Zn)	

Chelating Agent:

EDTA1.14%

Derivatives and Ingredients:

Contact Grasshopper Fertilizer for additional information regarding derivatives and ingredients.

Potential Acidity:

US: 890 lbs Calcium Carbonate eq
CAN: 404 kg Calcium Carbonate eq

Solubility (max):

US: 3 lbs per gallon
CAN: 1.36 kg per gallon.

Application:

Driver is a great fertilizer on all grasses, trees and shrubs. Driver can be used as a complete fertilizer program or as a supplement to correct nutrient and color deficiencies.

Application Frequency:

May be applied every 10-30 days or as required by growth and health conditions of the plant.

Standard Rate:

1 bag per 2 acres depending on plant and conditions.

Note: Contact your local Dealer regarding specific application rates.

Use Suggestions:

- Do not apply to drought stressed plants.
- Apply in early morning or late evening to avoid burn during excessively hot conditions.

Recommended Concentration:

- US: 1 bag per 24-30 gallons of water
- CAN: 1 bag per 90-114 liters of water

Caution: This fertilizer contains Boron, Copper, Iron, Manganese, Zinc, Molybdenum and should be used only as recommended. It may prove harmful when misused.
